## OF CLAYS AND TRAPS

Dear Customer,

When you purchase your new Laporte® equipment, you are purchasing one of most durable traps on the market.

An Olympic quality trap selected for eight Olympics. The Laporte® brand offers the most reliable trap with the least consumption of energy.

Our traps also have the largest capacity ever with the introduction of our 18 column trap. An innovative design that has the ability to hold 1,000 clays while maintaining the same accuracy and consistency unmatched by any competitor.

The traps work perfectly, even when fully loaded at extreme angles. They also feature the fastest release system and are adjustable for any competitions or training.

**By choosing Laporte®, you are not only choosing quality, innovative technology and reliability but also, an excellent after sales service including technicians and technical support.**

The best way to drive  
**THE BIGGEST COMPETITIONS**  
with maximum 2 technicians

**DUBAÏ** (Nad Al Sheba) -140 traps: 2 technicians  
**RIO OLYMPIC GAMES:** 2 technicians  
**COMMONWEALTH GAMES:** 1 technician  
**TOKYO OLYMPIC GAMES:** 2 technicians

# LAPORTE® CLAY TARGETS

## LAPORTE® COMPETITION

THE GLOBAL BENCHMARK FOR QUALITY

### Angled Edge

Strengthens the most vulnerable point in a clay.

### Weather Grooves

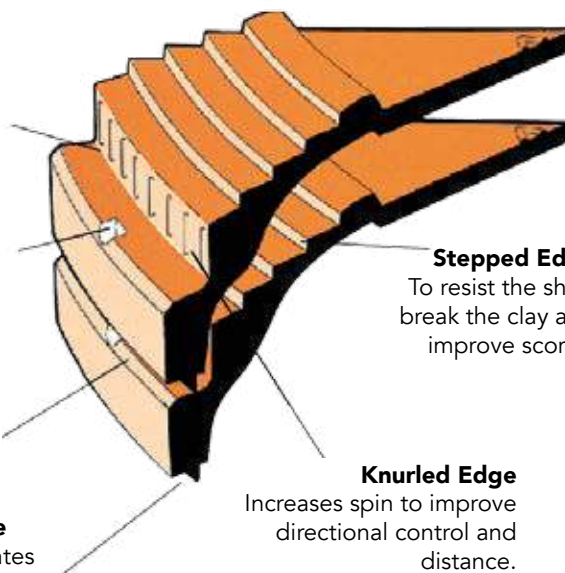

Air vents between clays to prevent sticking in damp conditions.

### Bevelled Edge

Uniquely angled to assist knife separator entry.

### Chamfered Edge

This chamfer creates the perfect gap for knife separators.

### Stepped Edge

To resist the shot, break the clay and improve scores.

### Knurled Edge

Increases spin to improve directional control and distance.

Developed by our engineers for shooters to use during their training in any discipline. After extensive trials and in-depth research this clay meets all criteria for quality and reliability which makes Laporte Company world renowned. **LAPORTE® Company since 1927.**

The **STANDARD COMPETITION** model with the famous Stepped Edges, is a must use all over the World

**LAPORTE® ECOBIRD COMPETITION & NATURAL COMPETITION** models have our famous «**LEAD CATCHERS**» Registered Design giving the shooter the advantage of impact breakability.

### FLASH® EFFECT !

With our perfectly balanced mix our Resin Clays smoke on impact creating our famous Flash Effect! Petroleum Resin RP provides the same effect.

## LAPORTE® GRAND PRIX

THE MOST INNOVATIVE, WELL ENGINEERED AND WELL IMPLEMENTED CONCEPT

### WEATHER GROOVES...

To prevent clays from sticking in damp conditions.

### INTERIOR GROOVES...

To increase breakability and improve scores.

### DRIVING BAND WITH MORE RIDGES...

For maximum rotation and excellent stability in flight.  
Reinforced structure allows the clay to be thrown at a distance of more than 100 m.

### DOME PROFILE...

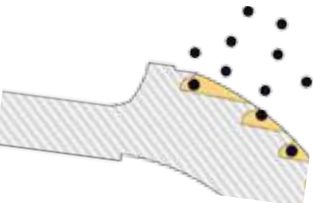

For a more aerodynamic profile.

### CHAMFERED EDGE...

To avoid adjustment of the clay separator on machines and reduce the number of no-birds.

### DIMPLE DESIGN...

Studied by German engineers, the numerous square indentations are real lead "catchers".  
Avoiding ricochet and considerably increasing the breakability of the clay.

**LEAD  
CATCHERS**  
REGISTERED DESIGN

Worldwide exclusive created by Laporte® to guarantee perfect breakability of the target at the very first impact.  
Unlike the rounded hollow profile of a golf ball, our design prevents any rebound or slippage of the projectile on the target.
